The strategies described in this presentation are non-traditional approaches to investing and may contain a great deal of risk.

OVERVIEW

« ABSOLUTE RETURN ALPHA STRATEGY » is a proprietary systematic managed futures and spot FX trading strategy which trades all four major futures asset classes: Commodities, FX, Interest Rates and Equity Indices.

The strategy includes two complementary proprietary trend-driven trading models that work in tandem to identify opportunities across a diversified basket of the most liquid trading assets:

The Trend Breakout Model – Buys or sells technical breakouts, thereby ensuring participation in every major trend.

The Pullback Trend Model – Buys or sells short-term and / or intermediate-term pullbacks within the context of the major trend.

With no long-term bias to any market, we trade short-term as well as intermediate-term corrections within the context of the longer-term trend, (along with trend-following breakouts) and are therefore uncorrelated to both “long only” investment strategies as well as traditional long-term trend following managed futures funds.

TRADING EXPERTISE: WE LITERALLY WROTE THE BOOK

Richard Weissman developer of the Absolute Return Alpha Strategy, is also the author of two books on trading, both printed by recognized financial publisher Wiley Trading.

 - Registered as a CTA since 2010
- Serves as CEO of THE TAPE READER LLC
- Serves as a director of AMEXA AGENCY SA, a Swiss consulting company which assists treasurers, asset managers and traders to handle their currency and commodity exposure

BENEFITS / OPPORTUNITY

The Absolute Return Alpha Strategy provides diversification opportunities to both traditional assets as well as long-term trend following managed futures funds.

Multiple asset classes of Futures

We trade in interest rates, commodities, FX and equity indices.

An unwavering systematic approach

We never deviate from our approach irrespective of performance (positive or negative) nor where we are in the calendar month or year. All trading modifications are in accordance with pre-determined risk management protocols (including severity of drawdown and drawdown duration).

PROGRAM OBJECTIVES

Using managed futures, the program aims at providing a client portfolio with:

- Transparency
- Diversification
- Low Correlation
- Protection
- Liquidity
- Absolute Return

VALUE PROPOSITION: AN UNBIASED DIVERSIFIER

With no long-term bias to any market, we trade short-term as well as intermediate-term corrections within the context of the longer-term trend, (along with trend-following breakouts) and are therefore uncorrelated to traditional investments (equities and debt securities) as well as long-term trend following managed futures funds.

Our average hold time is ~30 days

Strategy traded live since January, 2023.

ARA: AN UNBIASED DIVERSIFIER

	ARA	S&P 500	Dunn	Mulvaney
ARA	1	0.00	0.28	0.48
S&P 500	0.00	1	-0.05	-0.07
Dunn	0.28	-0.05	1	0.7
Mulvaney	0.48	-0.07	0.7	1

Correlation Analysis from 1/1/2017 to 7/31/2024
+0.70 correlation between Dunn & Mulvaney

THE STRATEGY

The Absolute Return Alpha Strategy is comprised of two proprietary intermediate to long-term models applicable to all markets:

The Trend Breakout Model –
Buys or sells technical
breakouts, thereby minimizing
regret regarding “missing” a
major trend.

Short & Intermediate-Term
Correction Model – Buys or sells
short-term and / or intermediate-
term pullbacks within the trend,
thereby minimizing regret
regarding participating in
corrections within the major trend.

By monitoring where assets are within the long-term market cycle, these models minimize risk by capitalizing on market risk / reward asymmetry.

THE ABSOLUTE RETURN ALPHA STRATEGY

Minimizes risk by trading a diverse portfolio of assets, capitalizing on asymmetry of risk / reward which consistently arises in all assets due to the cyclical nature of volatility.

Strives for low correlation with major asset classes (debt and equity securities) as well as long-term trend following managed futures strategies.

100% systematic, proprietary, intermediate to long-term futures trading strategy that is applicable to all markets.

This model has been traded live since January, 2023

STRATEGY CHARACTERISTICS

Strives for low correlations.

With other major asset classes (S&P 500, Treasuries) as well as long-term trend-following managed futures funds.

No long or short-term bias.

We have no long-term bias on any market we trade.

Diligent Risk Management

We are willing to sacrifice some upside performance in order to minimize risk of ruin.

ASSETS TRADED

We trade only the most liquid assets.
